SARASOTA introduces the first remote control locking system. With the press of a button, the time saving remote control system, features the ability to operate the following functions from outside the boat:

- Lock & Unlock Compartment Latches
- Trim Down & Up (Trailer Position)
- Deck or Cabin Lights On
- Auxiliary Functions (12 volt)

Speed Up Locking & Storage Procedures

Safety & Convenience for Boat Occupants

Security for Personal Effects & Equipment

The Key Captain™ system's coding technique protects the unit from unwanted interference. The basic system configuration consists of:

FloatRemote™ Transmitter

- Additional transmitters are available that can be added and programmed by user.
- Transmitters are designed for marine use.
- Waterproof and designed for rugged handling.
- Floating transmitters can be easily found if dropped into water.

Control panel—Permanently sealed and tamper-proof unit.

- Unique system sleep mode
- Low power energy saving operation saves battery life.

Lock and Unlock Compartment Latches with the remote control.

Auxiliary Function Receiver(s)

- Heavy duty
- Easily added for expanded operation

Automatic Access Lock Latches

- Tough polycarbonate body
- #316 Stainless Steel operating components
- Smooth operation
- Contemporary looks
